EFINIX®

Discontinued Security Features for Titanium Ti60W64 Devices

Dear Efinix Customer,

Efinix, Inc. is announcing discontinued support of the security features for Titanium Ti60W64 devices.

Change Description:

All Ti60W64 devices with date codes of 2416 (2024 WW# 16) or later will no longer support the security features.

There is no change in the package pinout. No change in customer RTL designs is required. The change will not impact the functionality and performance of the devices.

A FAQ is available <Link to FAQ> to assist and provide more information to customers. Customers can also contact the Efinix FAE/Sales Team for further assistance.

Affected Products:

This change affects the following Titanium ordering codes:

Ti60W64C3	Ti60W64I3

Reason for Change:

Ti60W64 has limited pins on the package to support the fuse programing required for the security features.

Date of Implementation:

Ti60W64 with manufacturing date code 2416 and onwards.

Samples for customer evaluation will be available by early May 2024. Orders for customer samples can be placed now.

Upon receipt of PCN: If a written request for additional information or rejection is not provided to Efinix, Inc. prior to 16-August-2024, the PCN will be considered accepted.

Contact:

For more information, please contact a Sales & Marketing, FAE, or Quality Assurance Engineering representative in your region.
